2023 Interim Management Report of Fund Performance

T. Rowe Price Global Allocation Fund
(formerly Morningstar Balanced Portfolio)

T. ROWE PRICE GLOBAL ALLOCATION FUND

This interim management report of fund performance contains financial highlights but does not contain the complete interim or annual financial statements of the Fund. The interim or annual financial statements are in a separate booklet. You may obtain a copy of the interim or annual financial statements at your request, and at no cost, by calling toll-free 1.888.861.9998, by writing to us at Bridgehouse Asset Managers, 6 Adelaide Street East, Suite 900, Toronto, ON, M5C 1H6, or by visiting our website: www.bridgehousecanada.com or the SEDAR website: www.sedar.com.

You may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

T. Rowe Price Global Allocation Fund (the "Fund") is managed and advised by Brandes Investments Partners & Co., operating as Bridgehouse Asset Managers ("Bridgehouse" or the "Manager"). Bridgehouse has appointed T. Rowe Price (Canada), Inc. ("T. Rowe Price") as the portfolio sub-advisor in respect of the Fund.

Results of Operations from January 1, 2023 to June 30, 2023

Markets & Effect

Global equity markets advanced during the first half of 2023, although returns across regions were widely mixed. Headwinds to growth that garnered headlines earlier in the year, including banking sector uncertainty and the U.S. debt ceiling debate, died down over the course of the second quarter, providing a boost to market sentiment. Bond yields resumed their upward trajectory amid renewed optimism for growth.

In Europe, equity markets, as measured by the MSCI EAFE Index, were up 9.1%, as hopes that interest rates could be close to peaking drove early gains. However, advances were curbed as central banks indicated expectations that rates could remain higher for longer, coupled with headwinds from a slowdown in China and uncertainty surrounding negotiations over raising the federal debt ceiling in the U.S.

Emerging markets equities, represented by the MSCI Emerging Markets Index, posted a modest gain of 2.4%, even as Chinese stocks notched nearly a double-digit decline in the second quarter amid concerns that China's economic growth was weakening.

Global central banks may be approaching a peak in the tightening cycle as inflation slowly recedes, although a divergent approach underscores the uncertainty in the current environment. The U.S. Federal Reserve may be closer to pausing interest rate increases as it emphasizes a data-dependent approach, while the European Central Bank and the Bank of England face stickier inflation and remain on a tightening course. The Bank of Japan, meanwhile, is expected to push out a shift in its yield curve control policy to later in the year. While the pace of global interest rate increases has cooled, we expect volatility to remain elevated

in the near term as the effects of diminished liquidity and falling earnings expectations are reflected in markets. Many signals of economic strength have surprised to the upside, despite evidence of tightening financial conditions that are expected to weigh on growth during the latter half of this year. Other key risks to global markets include a worse-than-expected decline in growth, central bank missteps, persistent inflation, and geopolitical tensions.

Performance

The Fund's Series A units trailed its benchmark, gaining 5.1% versus a gain of 8.4% for the T. Rowe Price Global Allocation Benchmark (the "Blended Benchmark").

The Fund returns are after the deduction of fees and expenses while the benchmark returns do not include any costs of investing. See the "Past Performance" section for the returns of the other series, which may vary because of differences in management fees and expenses or timing of series introduction.

Asset Mix

At June 30, 2023, investment funds made up 15.3% of the Fund, equities made up 53.4%, fixed income represented 25.0%, and approximately 6.3% was in cash and other net assets.

The Manager confirms that the Fund did not borrow money during the period.

Flows & Fees

The Fund's Net Asset Value increased to \$119.6 million at June 30, 2023, from \$77.6 million at December 31, 2022. Of this change, an increase of \$4.7 million was due to positive investment performance (net of investment income), and an increase of \$37.3 million was due to net inflows.

For Series A units, the annualized management expense ratio ("MER") at June 30, 2023 is 2.19%, compared to 2.27% at December 31, 2022.

Recent Developments

Morningstar Conservative Portfolio, Morningstar Growth Portfolio and Morningstar Moderate Portfolio were merged into the Morningstar Balanced Portfolio on January 27, 2023. All costs and expenses associated with the mergers were borne by the Manager.

Bridgehouse proposed a new investment objective for the Morningstar Balanced Portfolio to be voted on by securityholders on January 24, 2023. The investment objective change was completed on January 30, 2023. In connection with this change and effective on January 30, 2023, the Fund's portfolio sub-advisor was changed to T. Rowe Price; the Fund's investment strategies were modified to better reflect the approach utilized by T. Rowe Price in managing multi-asset portfolios; the name of the Fund was changed to T. Rowe Price Global Allocation Fund; and management fees were reduced from 1.75% to 1.70% in respect of Series A units and from 0.75% to 0.70% in respect of the Series F Units.

The invasion of Ukraine by Russia on February 24, 2022 has resulted in western economic sanctions being imposed on Russia, notably barring Russian banks from the SWIFT financial messaging system, a key piece of banking infrastructure. In response to sanctions, Russian markets have been closed to all foreign investors. This has caused material volatility in Russian financial markets and impacted liquidity, market access and reliability of security prices. In addition, export embargoes may lead to increased volatility in commodity prices and global supply chain disruptions. It is uncertain how long the conflict, economic sanctions and market instability will continue and whether they will escalate further. The Fund manager and portfolio sub-advisor(s) continue to actively monitor the situation for any impacts on the Fund's existing as well as potential new holdings.

Related Party Transactions

Manager and Portfolio Sub-Advisor

Bridgehouse provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. Bridgehouse receives a monthly management fee based on the daily average net assets of each series of the Fund. In addition, Bridgehouse is entitled to be reimbursed by the Fund for certain operating expenses.

Bridgehouse pays T. Rowe Price an investment management fee to provide the Fund with investment management services.

Forward-Looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, performance, decisions, circumstances, opportunities, risks or other matters. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions, or that include words such as "may", "will", "should", "could", "expect", "anticipate", "intend", "plan", "believe", or "estimate" or other similar expressions. These statements require us to make assumptions and are subject to inherent risks and uncertainties. Our predictions and other forward-looking statements may not prove to be accurate, or a number of factors could cause actual events, results, performance, etc. to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors could include, among others, market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest, and the risks detailed from time to time in the Fund's simplified prospectus. Forward-looking statements are not guarantees of future performance. For these reasons, it is important that readers do not place undue reliance on our forward-looking statements and should be aware that the Fund may not update any forward-looking statements whether as a result of new information, future events or otherwise.

Benchmark Index

T. Rowe Price Global Allocation Benchmark: This blended benchmark is weighted 60% MSCI All Country World Index, 28% Bloomberg Global Aggregate Bond Index (Hedged), and 12% FTSE Canada 91 Day T-Bill Index.

Bloomberg Global Aggregate Bond Index (Hedged): This index is a broad-based measure of the global investment-grade fixed-rate debt markets. The hedged version minimizes the exposure of currency fluctuations on index performance.

FTSE Canada 91 day T-Bill Index: This index measures the performance attributable to 91-day Canadian Treasury Bills. Treasury Bills are secured by the full faith and credit of the Canadian Government and offer a fixed rate of return.

MSCI All Country World Index: This index consists of equities from 23 developed markets, including Canada, the U.S., and 24 emerging markets countries around the world.

FINANCIAL HIGHLIGHTS

FOR THE SIX MONTHS ENDED JUNE 30, 2023 AND PERIODS ENDED DECEMBER 31, 2018 TO 2022

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended June 30, 2023 and for the past five periods ended December 31, as applicable. In the year a fund or series is established, 'period' represents inception to December 31 of that year. In all other cases, 'period' represents year ended December 31. Inception date for Series A, F and I is May 17, 2017.

- The financial information presented in the Net Assets per Unit table is derived from the Fund's audited financial statements.
- Net Assets and distributions are per Unit of a series are based on the actual number of units outstanding for that series at the relevant time. The Increase (Decrease) from Operations per Unit of a series is based on the weighted average number of units outstanding for that series during the financial period.
- Distributions per Unit of a series are based on the number of units outstanding for the series on the record dates for the distributions. Distributions were paid in cash/reinvested in additional units of the Fund or both.

- The financial information presented in the Ratios and Supplemental Data table is derived from the Fund's Net Asset Value and is provided as at December 31 of the years shown.
- The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including GST/HST and interest and excluding commissions and other portfolio transaction costs, and the Portfolio's proportionate share of the MER, if applicable, of the Underlying Funds and Exchange Traded Funds in which the Portfolio has invested, allocated to that Series, and is expressed as a percentage of the average daily Net Asset Value of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorptions can be terminated at any time. The MERs of the Fund are shown both with and without the waiver and absorptions.
- Portfolio turnover rate is calculated at the Fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- The trading expense ratio represents total commissions and other portfolio transaction costs, including the Portfolio's proportionate share of the commissions, if applicable, of the Underlying Funds and Exchange Traded Funds in which the Portfolio has invested, expressed as an annualized percentage of daily average Net Asset Value of the Fund. The trading expense ratio is calculated at the Fund level and applies to all series of the Fund.

MANAGEMENT FEES

Bridgehouse Asset Managers, the Manager, provides or arranges for investment management, distribution, marketing and promotion of the Fund. In consideration for the services provided, Bridgehouse Asset Managers receives a monthly management fee based on the daily average Net Asset Value of Series A and Series F. Management fees for Series I are negotiated and paid directly by the unitholders of Series I, not by the Fund.

For the six months period June 30, 2023, the Fund paid Bridgehouse Asset Managers management fees of \$720,061. Bridgehouse uses these management fees to pay for commission payments to registered brokers and dealers and general investment management expenses. The breakdown (commission payments / investment management, administration and other) as a proportion of the management fee for each Series are:

- Series A (52% / 48%)
- Series F (0% / 100%)
- Series I (0% / 100%)

Commission payments represent cash commissions paid by Bridgehouse Asset Managers to registered brokers and dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by the Bridgehouse Asset Managers during the period. For new Funds or Series the amount presented may not be indicative of longer term operating periods.

PAST PERFORMANCE

This section shows the historical performance for each series of the Fund for the six months ended June 30, 2023 and each of the previous annual periods ended December 31. Historical performance is based on the change in Net Asset Value per unit, assuming reinvestment of all distributions. Management fees and operating expenses have been taken into account before calculating performance, except in the case of Series I units where the management fee is calculated outside of the Fund. Series I performance does take into account embedded management fees and operating expenses from underlying investments that the Fund may hold. Historical performance does not take into account the potential impact on returns of purchases, redemptions, distribution fees or other optional charges or income taxes payable by an investor. Keep in mind that past performance does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns (%)

The bar chart shows the Fund's annual performance for each of the years shown. The bar chart shows how the performance of each series of the Fund has changed from year to year. It illustrates in percentage terms how much an investment in each series of the Fund made on January 1 of each year, or on the inception dates, would have grown or decreased by the last day of each financial year. 2023 data presented below is for the six-month period ended June 30, 2023.

*2017 Series A returns are from May 17, 2017
 †Six-month return from January 1 to June 30, 2023.

*2017 Series F returns are from May 17, 2017
 †Six-month return from January 1 to June 30, 2023.

*2017 Series I returns are from May 17, 2017
 †Six-month return from January 1 to June 30, 2023.
