2021 Annual Management Report
of Fund Performance

Morningstar Strategic Canadian Equity Fund

MORNINGSTAR STRATEGIC CANADIAN EQUITY FUND

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Fund. The annual financial statements are in a separate booklet. You may obtain a copy of the annual financial statements at your request, and at no cost, by calling toll-free 1.888.861.9998, by writing to us at Bridgehouse Asset Managers, 36 Toronto Street, Suite 850, Toronto, ON, M5C 2C5, or by visiting our website: www.bridgehousecanada.com or the SEDAR website: www.sedar.com.

You may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The objective of the Fund is to achieve long-term capital growth by investing primarily in the equity securities of Canadian issuers.

Morningstar Associates, Inc. ("Morningstar") invests in liquid Canadian companies across the market capitalization spectrum using a disciplined rules-based process based on a combination of diversified factors such as value, quality, reasonable risk and momentum.

The Fund will invest in Canadian companies with allocations limited to 5% at time of purchase, and with a typical exposure of up to 30% in any one Global Industry Classification Standard ("GICS") sector.

Risk

As an investor in this Fund, you should be prepared for short-term performance fluctuations, and be a patient, long-term holder.

There were no significant changes to the level or type of risk you would expect from the Fund over the course of the year. It continues to have a medium risk level. Refer to the Fund's simplified prospectus for a complete list of all risks.

Results of Operations from January 1, 2021 to December 31, 2021

Markets & Effect

Overall, 2021 will be remembered as a great year for growth investors but a difficult year for defensive investors. In the first half of the year, economic reopenings and coronavirus vaccinations drove a rally in value-oriented stocks. Many companies that had been decimated by the pandemic, such as travel companies, began to bounce back, and industrial and materials stocks had strong showings in the first half of the year. Developed-markets financials, energy, and consumer discretionary stocks all increased as confidence in the economic recovery grew, but emerging-markets stocks didn't keep up in those sectors.

The second half of the year was a different story, as inflationary pressures, the prospect of tightening monetary conditions, and the resurgent pandemic threw cold water on the rally, especially in emerging markets. Developed-market equities continued to rise but saw greater volatility as the year came to a close.

Canadian stocks, as represented by the S&P/TSX Composite Index, had a strong year, gaining 25.1%. Energy stocks led the way, with the sector up 48.9% for the period. Energy prices, and non-energy commodity prices to a lesser extent, continued to add to inflationary pressures. During the pandemic, production cuts have led to decreased supply, and suppliers are only tentatively increasing production to meet increasing demand, even as prices have continued to rise. Unemployment has continued to decline since its early 2020 highs and was sitting at 5.9% as of October 2021, which is very close to pre-pandemic levels. Given the government has seen a measure of growth in the economy as people return to work, COVID-19 related government relief programs, such as the Canada Emergency Response Benefit (CERB), are no longer available and the consensus for the initiation of Bank of Canada interest rate increases seems to be in the first half of 2022.

Omicron, inflation, and higher interest rates top the list of investor concerns, while stretched valuations would hint at a narrowed opportunity set. It is important to remember that the future holds a wide range of possible outcomes: Morningstar's approach is to view the future probabilistically and think long term.

Performance

The Fund's Series A units trailed its benchmark, gaining 20.4% versus a gain of 25.1% for the S&P/TSX Composite Index (the "Index").

The Fund returns are after the deduction of fees and expenses while the benchmark returns do not include any costs of investing. See the "Past Performance" section for the returns of the other series, which may vary because of differences in management fees and expenses or timing of series introduction.

Asset Mix

At December 31, 2021, equities made up 97.7% of the Fund, and approximately 2.3% was in cash and other net assets.

The Fund's most significant industry exposure change was a decrease in holdings in software to 5.7% from 8.8% at December 31, 2020.

The Manager confirms that the Fund did not borrow money during the period.

Flows & Fees

The Fund's Net Asset Value increased to \$39.0 million at December 31, 2021, from \$31.2 million at December 31, 2020. Of this change, an increase of \$6.6 million was due to positive investment performance (net of investment income), and an increase of \$1.2 million was due to net inflows.

For Series A units, the annualized management expense ratio ("MER") at December 31, 2021 is 1.98%, compared to 1.97% at December 31, 2020.

Recent Developments

There are no known changes at this time to the strategic positioning of the Fund, the manager, or portfolio sub-advisor.

The invasion of Ukraine by Russia on February 24, 2022 has resulted in western economic sanctions being imposed on Russia, notably barring Russian banks from the SWIFT financial messaging system, a key piece of banking infrastructure. In response to sanctions, Russian markets have been closed to all foreign investors. This has caused material volatility in Russian financial markets and impacted liquidity, market access and reliability of security prices. In addition, export embargoes may lead to increased volatility in commodity prices and global supply chain disruptions. It is uncertain how long the conflict, economic sanctions and market instability will continue and whether they will escalate further. The Fund manager and portfolio sub-advisor(s) continue to actively monitor the situation for any impacts on the Fund's existing as well as potential new holdings.

Effective on or before April 22, 2022, Bridgehouse will no longer pay trailing commissions to dealers that do not make a suitability determination, such as order-execution-only ("OEO") dealers, in accordance with the Canadian Securities Administrators' decision to end the payment of trailing commissions to OEO dealers that comes into effect on June 1, 2022. Accounts held at OEO dealers will only be permitted to purchase or hold securities of Series F of the Fund, which does not pay a trailing commission.

On March 16, 2022, Bridgehouse announced that effective at the close of business on or about April 22, 2022, all Series A units of the Fund held in accounts at OEO dealers and all

Series D units of the Fund, will be switched into Series F at no cost to the unitholder and without a disposition for tax purposes.

On March 16, 2022, Bridgehouse announced its intention to terminate Series D of the Fund on or about April 22, 2022. Effective on or about March 16, 2022, Series D units of the Fund will no longer be available for purchase by new or existing unitholders, including purchases made through a pre-authorized purchase plan.

The outbreak of the novel coronavirus, first detected in December 2019, rapidly became a pandemic and resulted in disruptions to the economies of many nations, individual companies and the markets in general. This created closed borders, quarantines, supply chain disruptions and general anxiety, which negatively impacted global markets in an unforeseeable manner. The impact of the novel coronavirus and other such future infectious diseases in certain regions or countries may be greater or less due to the nature or level of their public health responses or due to other factors. Health crises caused by the coronavirus outbreak or future infectious diseases may exacerbate other pre-existing political, social and economic risks in certain countries. The impact of such health crises may be quick, severe and of unknowable duration. This pandemic and other epidemics and pandemics that may arise in the future could result in continued volatility in the financial markets and lead to increased levels of Fund redemptions, which could have a negative impact on the Funds and could adversely affect a Fund's performance.

Related Party Transactions

Manager and Portfolio Sub-Advisor

The Fund is managed and advised by Brandes Investment Partners & Co., operating as Bridgehouse Asset Managers ("Bridgehouse") which provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. Bridgehouse receives a monthly management fee based on the daily average net assets of each series of the Fund. In addition, Bridgehouse is entitled to be reimbursed by the Fund for certain operating expenses.

Bridgehouse has retained Morningstar Associates, Inc. ("Morningstar") as the portfolio sub-advisor to the Fund. Bridgehouse pays Morningstar an investment management fee to provide the Fund with investment management services.

Forward-Looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, performance, decisions, circumstances, opportunities, risks or other matters. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions, or that include words such as "may", "will", "should", "could", "expect", "anticipate", "intend", "plan",

“believe”, or “estimate” or other similar expressions. These statements require us to make assumptions and are subject to inherent risks and uncertainties. Our predictions and other forward-looking statements may not prove to be accurate, or a number of factors could cause actual events, results, performance, etc. to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors could include, among others, market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest, and the risks detailed from time to time in the Fund’s simplified prospectus. Forward-looking statements are not guarantees of future performance. For these reasons, it is important that readers do not place undue reliance on our forward-looking statements and should be aware that the Fund may not update any forward-looking statements whether as a result of new information, future events or otherwise.

Benchmark Index

S&P/TSX Composite Index: This index tracks the performance of some of the largest and most widely held Canadian stocks listed on the Toronto Stock Exchange.

FINANCIAL HIGHLIGHTS

FOR PERIODS ENDED DECEMBER 31, 2017 TO 2021

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five periods ended December 31 or, if shorter, the period since the inception of the Fund. In the year a fund or series is established, 'period' represents inception to December 31 of that year. In all other cases, 'period' represents year ended December 31. Inception date for Series A, D, F and I is September 16, 2016.

- The financial information presented in the Net Assets per Unit table is derived from the Fund's audited financial statements.
- Net Assets and distributions are per Unit of a series are based on the actual number of units outstanding for that series at the relevant time. The Increase (Decrease) from Operations per Unit of a series is based on the weighted average number of units outstanding for that series during the financial period.
- Distributions per Unit of a series are based on the number of units outstanding for the series on the record dates for the distributions. Distributions were paid in cash/reinvested in additional units of the Fund or both.

	2017	182	15	0.00	0.00	-	-	11.94

- The financial information presented in the Ratios and Supplemental Data table is derived from the Fund's Net Asset Value and is provided as at December 31 of the years shown.
- The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including GST/HST and interest and excluding commissions and other portfolio transaction costs, and is expressed as a percentage of the average daily Net Asset Value of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorptions can be terminated at any time. The MERs of the Fund are shown both with and without the waiver and absorptions.
- Portfolio turnover rate is calculated at the Fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value of the Fund. The trading expense ratio is calculated at the Fund level and applies to all series of the Fund.

MANAGEMENT FEES

Bridgehouse Asset Managers, the Manager, provides or arranges for investment management, distribution, marketing and promotion of the Fund. In consideration for the services provided, Bridgehouse Asset Managers receives a monthly management fee based on the daily average Net Asset Value of Series A, Series D and Series F. Management fees for Series I are negotiated and paid directly by the unitholders of Series I, not by the Fund.

For the year ended December 31, 2021, the Fund paid Bridgehouse Asset Managers management fees of \$349,891. Bridgehouse uses these management fees to pay for commission payments to registered brokers and dealers and general investment management expenses. The breakdown (commission payments / investment management, administration and other) as a proportion of the management fee for each Series are:

- Series A (59% / 41%)
- Series D (20% / 80%)
- Series F (0% / 100%)
- Series I (0% / 100%)

Commission payments represent cash commissions paid by Bridgehouse Asset Managers to registered brokers and dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by the Bridgehouse Asset Managers during the period. For new Funds or Series the amount presented may not be indicative of longer term operating periods.

PAST PERFORMANCE

This section shows the historical performance for each series of the Fund for the periods ended December 31. Historical performance is based on the change in Net Asset Value per unit, assuming reinvestment of all distributions. Management fees and operating expenses have been taken into account before calculating performance, except in the case of Series I units where the management fee is calculated outside of the Fund. Historical performance does not take into account the potential impact on returns of purchases, redemptions, distribution fees or other optional charges or income taxes payable by an investor. Keep in mind that past performance does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns (%)

The bar chart shows the Fund's annual performance for each of the years shown. The bar chart shows how the performance of each series of the Fund has changed from year to year. It illustrates in percentage terms how much an investment in each series of the Fund made on January 1 of each year, or on the inception dates, would have grown or decreased by the last day of each financial year.

*2016 Series A returns are from September 16, 2016

*2016 Series D returns are from September 16, 2016

*2016 Series F returns are from September 16, 2016

*2016 Series I returns are from September 16, 2016

Annual Compound Returns (%)

The table shows the historical annual compound total return for each series of the Fund as compared to the benchmarks listed below. The returns are for periods ended December 31, 2021. For a discussion of the relative performance of the Fund as compared to the index, please refer to the “Results of Operations” section in the “Management Discussion of Fund Performance”.

	1 year	3 years	5 years	Since Inception
Series A	20.43	13.80	8.05	8.60
Series D	21.79	15.09	9.26	9.76
